- Schools
- Colleges and Universities
- Offices
- Storage Rooms
- Safe Rooms

SAFEBOLT™ Patent Pending

Code-Compliant Barricade Lock

SAFEBOLT™ | Applications

- Schools
- Colleges and Universities
- Offices
- Storage Rooms
- Safe Rooms

SAFEBOLT™

SAFEBOLT™ is the fastest way to barricade a classroom door while maintaining 100% code compliance. Anyone in the room can press the red button and project a 1" locking bolt to secure the room. SAFEBOLT™ retrofits to existing cylindrical lever locks, making it affordable and easy-to-install.

Keyless Instant Lockdown

- No scrambling to find the classroom key, simply press the red button

Retrofits To Existing Cylindrical Lever Locks

- Cost Efficient: Keep existing cylindrical door locks and keying systems by mounting the SAFEBOLT™ over the existing lock with the collar and adapter ring

Superior Intruder Protection

- Full 1 inch throw stainless steel locking bolt and latch

High Visibility Indicator

- The visual indicator notifies occupants that the door is bolted

Free Egress

- A single motion retracts the bolt and latch from the inside at all times
- ADA compliant, meets all applicable life-safety codes

Keyed Entry

- Staff and first responders can always enter by key
- No one is ever locked in

Easy to Install

- Inswing and Outswing models available
- Thru-bolted assembly
- Accepts any standard rim cylinder
- Metal installation template ensures smooth and speedy installation

Certifications

- SAFEBOLT™ is approved to be used as a component in a Fire Door assembly with 1/3-hour rating with Hose Stream

Available Models	
SB175-LC- ____	For 1-3/4 - 2" thick door Add handing for complete model number (LH, RH, LHR, RHR)
-BPS	Bolt Position Signal Append to model number Requires external wiring
Door Marking Template	
SBTMPL1	Reusable steel marking template

About | Securitech® is proud of our hard-earned reputation as the leading "Go-To" American manufacturer for special locking solutions. We are a continuous product development company and the products seen in our catalogue secure thousands of locations every day, but should be seen as the starting point for solving your particular needs.

How Does It Work?

A single press of the red button projects the locking bolt & instantly locks down the classroom in a code-compliant manner. The classroom lock functions in its normal manner at all times, with exiting always possible in a single motion, even when the SAFEBOLT™ locking bolt is engaged.

Entry is always possible by key, meeting code requirements for keyed entry to any locked classroom.

SAFEBOLT™ is the code-compliant classroom barricade device.

SAFEBOLT™ Lets Teachers Focus On Students:

One simple push of the red button assures the teacher that their door is properly secured. This one-step approach allows the teacher to instantly focus on sheltering in place or evacuating.

Precious seconds and minutes are saved with this system.

Safety And Security:

Teachers or students can instantly secure doors in case of an emergency, without having to search for a key. Staff and first responders can enter by key at any time. SAFEBOLT™ provides instant and maximum protection to doors securing students or employees while maintaining free egress at all times to meet life safety codes.

Available through authorized SAFEBOLT™ dealers
